SUMMARY

Computer Science and Data Science graduate with hands-on experience in Full-Stack Development, AI, Machine Learning, and Retrieval-Augmented Generation (RAG). Skilled in building scalable web applications, REST APIs, authentication systems, and AI-powered solutions

EDUCATION

Indian Institute of Technology Madras	2022–2026
Bachelor of Science (B.S.) - Data Science and Applications	CGPA: 6.73
Jamia Hamdard	2021–2025
Bachelor of Technology - Computer Science and Engineering (Artificial Intelligence)	CGPA: 8.26
Daffodil Public School, Delhi	2021
Class 12	76.4%
Mayoor School, Noida	2019
Class 10	89.66%

SKILLS

Programming Languages: Python, C, SQL
Web Development: HTML, CSS, JavaScript, React, Vue.js, Flask, FastAPI
Artificial Intelligence and Data Science: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Llama 3.2, Ollama, Retrieval-Augmented Generation (RAG), Semantic Search, Vector Embeddings
Databases: PostgreSQL, SQLite
Core Computer Science: Data Structures and Algorithms, Object Oriented Programming (OOP), Database Management Systems, Operating Systems, Computer Networks
Tools and Technologies: JWT Authentication, Redis, Celery, REST APIs

PROJECTS

Legal Document Intelligence

- Developed a full-stack AI-powered legal document analysis platform using React, FastAPI, PostgreSQL, JWT Authentication, Retrieval-Augmented Generation (RAG), and FAISS for semantic search and legal question answering.
- Built a complete local RAG pipeline using Ollama (Llama 3.2), Nomic Embed embeddings, intelligent document chunking, and FAISS vector search for privacy-preserving semantic retrieval.
- Implemented retrieval-grounded legal question answering by integrating retrieved document chunks with Llama 3.2, reducing hallucinations and improving response accuracy.
- Designed secure RESTful APIs supporting PDF ingestion, automated document indexing, vector embedding generation, document re-indexing, and user authentication.

Gen AI Powered Personal Finance Assistant

- Built a full-stack personal finance assistant using FastAPI, React, PostgreSQL, JWT Authentication, and Llama 3.2.
- Developed expense tracking and category-based CRUD operations with relational database design.
- Integrated Llama 3.2 to generate contextual financial insights from transaction data.
- Designed RESTful APIs and backend services for financial analysis and AI-powered recommendations.

AI Resume Analyzer

- Built an AI-powered resume analyzer using FastAPI, React, PostgreSQL, JWT Authentication, and Gemini API to compare resumes with job descriptions and identify skill gaps.
- Developed secure backend services for user management and resume storage.
- Designed RESTful APIs for resume upload, analysis, authentication, and resume history management.
- Integrated the Gemini API to generate structured resume feedback and improvement suggestions.

Grocery Shopping App

- Developed a full-stack grocery shopping application using Flask, Vue.js, SQLite, SQLAlchemy, Flask-JWT-Extended, Redis, and Celery.
- Implemented JWT-based authentication, role-based access control (RBAC), and RESTful APIs using Flask, SQLAlchemy, Axios, and Flask-CORS.
- Designed efficient database operations for product and order management using SQLite and SQLAlchemy.
- Integrated Redis and Celery for asynchronous tasks, including email reminders and automated reports.
